Assistance at Spanish airports for persons with disabilities or reduced mobility

In compliance with Regulation (EC) no. 1107/2006 of the European Parliament, starting July 26th 2008 all European airports will offer assistance services for passengers with reduced mobility.

This European Community measure represents a significant social advance for disabled persons and for this reason all the necessary financial, material and human resources have been provided to make it possible for every Spanish airport to render a quality service guaranteeing that all people can enjoy air transport anywhere in Europe, regardless of their disability.

Different disabilities

  These passengers are entirely immobile and not self-sufficient. They must be accompanied to their seats and they need complete personal assistance. If the journey is more than three hours long, they need a companion.

- **WCHR**
  These are passengers who need help getting from the aircraft to the terminal. They can board and move around the aircraft on their own.

- **WCHS**
  These passengers need help getting from the aircraft to the terminal and also for boarding. They are self-sufficient inside the aircraft.

- **DEAF**
  Deaf passengers.

- **BLND**
  Passengers with visual disabilities.
