1. INTRODUCTION

Royal Decree-Law 13/2010, of December 3, has introduced an important modernization process, dividing the airport and air navigation management functions that in Spain had been performed by the Entidad Pública Empresarial Aena, with the objective of improving the efficiency and effectiveness of the Spanish airport system.

Aena Aeropuertos is created within this modernization process and it shall be responsible for the management of the airports which until now had been managed by Entidad Pública Empresarial Aena.

The Council of Ministers on June 3, 2011 approved an agreement which authorizes the asset transfer from Aena to Aena Aeropuertos and a rise in the capital stock of the new company. These measures are necessary for Aena Aeropuertos to start functioning effectively, from June 8, 2011.

Aena Aeropuertos shall carry out all the duties and obligations developed by Entidad Pública Empresarial Aena until June 7, 2011 as regards management and operation of airport services, and any others that national or international law gives to the airport operator, in relation to the network integrated by airports and heliports managed by Aena.

From July 5, 2014, Aena Aeropuertos S.A changes its name into Aena SME, S.A. The airports and heliports that it manages are the following:

Adolfo Suarez Madrid-Barajas and Josep Tarradellas Barcelona-El Prat.

Alicante Elche, Gran Canaria, Tenerife Sur, Málaga-Costa del Sol and Palma de Mallorca.

Bilbao, Fuerteventura, Girona, Ibiza, César Manrique-Lanzarote, Menorca, Santiago, Sevilla, Tenerife Norte and Valencia.

P: Total amount to pay for the service.

p₁: unit rate for the time in position at air bridge.

p₂: unit rate for the aircraft's weight and time at the air bridge.

T_m: maximum take-off weight of the aircraft, in tons.

F_t : time that the aircraft remains at the air bridge, per 15 minutes or period.

Unit rates for p₁ and p₂ are shown in the table below:

For those aircrafts connected to more than an air bridge simultaneously, and parked in apron positions specially designed for this purpose, the rates for each additional air bridge will be reduced by 75%.

Between zero and six, local time, when an aircraft is in an apron position and the operating company requests a remote parking position but at that time that place is not available, or if the airport operator decides not to change it due to operational reasons, the airport shall disconnect the apron service and shall interrupt the computation of time for charging purposes. However, the company will be forced to move the aircraft to a remote parking position when it will be required because there is available position or because the previous reasons have disappeared. Failure to do this and the fact that it cannot be used by any other users, upon request, the rate to apply will be the one that would have been payable if such uses are not made.

EXEMPTION AND INCENTIVES

6. INCENTIVES

Incentive for operations on certain days of the week in the Canary Airports 2023

There is a right to a subsidy of 50% of the amount of landing and passengers charges, for flights in airports in the Canary Islands - with the exception of inter-island flights- the days of the week that are reflected in the following table, provided that the beneficiary of the subsidy maintains the number of operations already scheduled for the remaining days of the week, at the deadline set by the industry for the return of slots of the winter season (August 31) and summer (January 31) accordingly.

Airport	Day of the week
Fuerteventura	Tuesday and Friday
Gran Canaria	Tuesday
La Palma	All days
Lanzarote	Wednesday
Tenerife Norte	Saturday
Tenerife Sur	Thursday

The enjoyment of this subsidy shall exclude the application of bonus for landing and passenger charges under Law 21/2003, Sections 75.7 and 78.3.

The subsidy must be requested during the month of January 2024, and will be met by Aena SME, S.A. offsetting the amount to any amounts owed by the beneficiaries and, if it cannot be possible in whole or in part, by payment in cash before May 31, 2024.

Extraordinary Incentive for La Palma Island Flights in 2023

This incentive means a 100% refund of the provision of airport facilities charge (passenger charge) in all flights that occur between the 1st of January 2023 to the 31st of December 2023 with a take-off from La Palma and arriving in Mainland Spain, Balearic Islands or an International destination. It is worth clarifying that this charge does not accrue on arrivals.

This commercial incentive shall not be accumulated with any other potential incentives that Aena may approve with effect on the passenger charge.

This incentive will apply at a rate that has already taken into account all applicable incentives and discounts to La Palma Airport related to the passenger charge¹.

Airlines can apply for this incentive until the 31st of January 2024. From that date onwards and before the 28th of February 2024, Aena S.M.E., S.A. shall accrue the incentive. The amount will be compensated with any due payments and if this will not be possible, it will be paid in cash.

¹ The Airline must send a request for all the rest of discounts and incentives applicable to La Palma Airport.

Incentive scheme to promote passenger traffic growth Winter 22 Season

Aena shall apply the following incentive scheme to increase the passenger traffic at its airports from the 1st of November 2022 to the 31st of March 2023.

The incentive will consist on a refund in each airline's average passenger charge applied to the departure commercial passengers carried by them at Aena S.M.E., S.A 's network airports and Murcia Region International Airport (AIRM), if the number of departure passengers carried by the airline exceeds the thresholds defined by geographic areas. The incentive shall also apply if an airline has no departure programmed seats at HBD but the number of departure passengers carried by the airline exceeds the load factor threshold defined by geographic areas. Additionally, conditions defined below in item IV must be met.

- I. To be able to receive the incentive, it is necessary that the seats programmed by the airlines at the end of the season is equal or more than the *"threshold of departure programmed seats at EOS compared to HBD"*.

The *"threshold of departure programmed seats at EOS compared to HBD"* is the percentage, defined for each geographical area, of departure programmed seats at the end of the season (End Of Season, EOS)¹ compared to the departure programmed seats at HBD (Historic Baseline Date)²

To verify this condition, Aena shall use the official source for slot programming at the coordinated and facilitated Spanish Airports and AIRM (AECFA) relative to 2022 Winter Season, consisting on 21 weeks.

To calculate this incentive, three geographical zones are defined according to the passenger traffic performance during the previous months prior to the implementation of this incentive, with the aim to establish the seat threshold of EOS in relation to HBD:

- Geographical Zone 1: Short haul³
- Geographical Zone 2: Latin America (Mexico is included)
- Geographical Zone 3: Long Haul (except Latin America)

The minimum seat threshold in EOS in relation to HBD to be able to receive the incentive is 85% for geographical zones 1 and 2 and 50% for zone 3. To calculate the incentive, only the airlines that exceed these thresholds shall be taken into account.

- II. For those airlines that fulfil the previous condition, the number of passengers incentivized will be equal to the number of those that exceed the respective load factor thresholds established in each zone at Aena S.M.E., S.A's network airports and AIRM.

¹ EOS is the deadline commonly used by the industry to present the slot program at the end of the season.

² HBD (Historic Baseline Date) is the deadline established in art. 10.4 of EU Regulation 95/93 for slot returns prior to Winter Season 2022, i.e. 31st August 2022.

³ Short haul corresponds to routes with less than a great circle distance of 4,000 Km from the Spanish Airports and long haul corresponds to more than 4,000 Km.

To calculate this incentive, each airline's load factor will be considered as the result of dividing the number of departure commercial passengers by the number of departure seats operated by them in each zone, at the end of the season, according to the data provided by the airlines and available at Aena's operating systems⁴.

The load factor thresholds shall be 80% for zones 1 and 2 and 70% for zone 3.

- III. Each airline's total amount of the incentive will be the result of multiplying the number of commercial departure passengers that exceed the load factor thresholds by its average passenger charge in each zone and the percentage of the refund established in each zone.

The percentages of the refund to be applied on the average passenger charge will be 50% for zones 1 and 2 and 100% for zone 3.

For the purposes of this incentive, the average passenger charge (with two decimal figures) shall be the total amount invoiced to each airline for the passenger charge in each zone from the 1st of November 2022 to the 31st of March 2023 divided by the total number of departure commercial passengers carried by the airline in each zone during the same period.

To calculate this incentive, the number of passengers that can receive the incentive shall be rounded to the nearest whole number.

- IV. To be able to receive this incentive, airlines must comply with all the following additional conditions:
- Carry at least 1,000 departure commercial passengers during the months of November 2022 to March 2023 within the three geographical areas.
 - Be up to date with all payments with Aena S.M.E., S.A.
 - Applications for this incentive must be submitted once, before the end of March 2023. The incentive will materialize before the end of July 2023.
- V. If an airline has no departure seats programmed in HBD and, during Winter Season 2022 starts operating at Aena S.M.E., S.A 's network airports and/or AIRM, it will be able to receive the incentive scheme and the passengers incentivised shall be those that exceed the load factor threshold mentioned previously per zone.

⁴ The service types considered are J - Scheduled Passenger Flight, G - Scheduled Additional Passenger Flight, C - Passenger Charter Flight, S - Airlift, B - Additional Airlift.

⁵ For the purpose of this incentive, the calculation of the average passenger charge will not take into account the discount that airlines may obtain for operations on certain days of the week at airports from the Canary Islands.

- VI. Aena, S.M.E., S.A. shall compensate this corresponding amount with any sums due by the beneficiaries. If there were no sums to be compensated, the amount shall be paid to the airline by Aena.

Aena, S.M.E., S.A. shall not proceed to a refund of the average passenger charge if, in order to benefit from this incentive or to have an effect on its amount, the airline would have been the recipient of an assignment or transfer of operations between itself and companies in the same group or with other companies with which it could share its flying program or align strategies.

In any case, if the situations described above arise as a result of purely operational aspects of the activity of airlines in the same group or which could share their flying programme, the corresponding amount of the incentive could be reduced in proportion to the effect of the transfer of operations carried out.

In the event of mergers, acquisitions or any other ownership changes of airlines that may affect this incentive, Aena reserves the right of treating those airlines as a single airline.

Aena S.M.E., S.A. reserves the right to refuse to apply the incentive if during the revision of the data and documents provided by airlines that have applied to it, it emerges that the application, any information or documentation provided is affected by errors, misleading information, omissions or any type of inaccuracy.

Incentive scheme for helicopter regular commercial operations that originate in the heliports of Ceuta and Algeciras during the Summer 2022 and Winter 2022 seasons.

Companies shall be entitled to an incentive for maintaining the number of passengers carried on routes operated from the heliports of Algeciras and Ceuta.

This incentive scheme shall apply in Summer 2022 and Winter 2022 Seasons, defined in the law 21/2003 and they will be considered independently.

The incentive shall be calculated at an amount equivalent to 50% of the average departure passenger charge and security charge of the company on the route and it will apply to the total number of commercial departure passengers on the route, only if at least 75% of the departure passengers carried on the route in the previous equivalent season are maintained.

In addition, to qualify for the incentive, the company must maintain at the relevant heliport at least 75 per cent of passengers registered in the previous equivalent season.

For the purposes of this incentive, a route (combined commercial passenger transport operations from the Heliport of Ceuta or Algeciras and destination at another airport or heliport) to a destination shall be considered to have been operated if it exceeds, 750 departing commercial passengers during the Summer season 2022 and 500, in the Winter season 2022.

This incentive shall not be cumulative with any other incentive in force at the time of its application.

Applications for this incentive must be submitted the month after the season has finished. Aena, S.M.E., S.A. shall compensate this corresponding amount with any sums due by the beneficiaries.

If this was not possible in whole or in part, the amount shall be paid to the airline by Aena before the end of the month after the request.

The maintenance of passengers of each company may not be due to the mere assignment or transfer of operations between it and companies of the same group, or with other companies that may share their program or align strategies that may facilitate their access to the incentive or have an effect on the amount of the incentive. In this regard, Aena S.M.E., S.A. reserves the right to refuse to apply the incentive, if during the revision of the data and documents provided by airlines that have applied to it, it emerges that the application or any information or documentation provided is affected by errors, misleading information, omissions, any type of inaccuracy or if there is proof of non-compliance of any requirement or any align strategies with other airlines.

Furthermore, the airline must be up to date with all payments with Aena S.M.E., S.A. as a condition to qualify for this incentive.

Exemptions

No aeronautical charges shall be satisfied, referred to in this guide, by the operations performed by the Spanish state aircrafts, aircraft serving for autonomous communities and other local entities, provided that they perform non commercial public services, and foreign State aircrafts, in the case that the Nations to which they belong have similar exemption for Spanish state aircrafts.
