## Assistance to disabled persons and persons with reduced mobility at Spanish airports

In compliance with Regulation (EC) 1107/2006 of the European Parliament, a service for passengers with reduced mobility will be implemented in all European airports as of 26 July 2008.

This community measure represents a great social advance for people with disabilities and for this reason, all the necessary economic, material and human resources have been made available to ensure that all Spanish airports provide a quality service that guarantees that all people can enjoy air travel between any point in Europe, regardless of their disability.
